IMPORTANT NOTICE NEW SAFETY RED COLOUR FOR QUICK IDENTIFICATION OF TERMX TERMITE TREATMENT SYSTEM

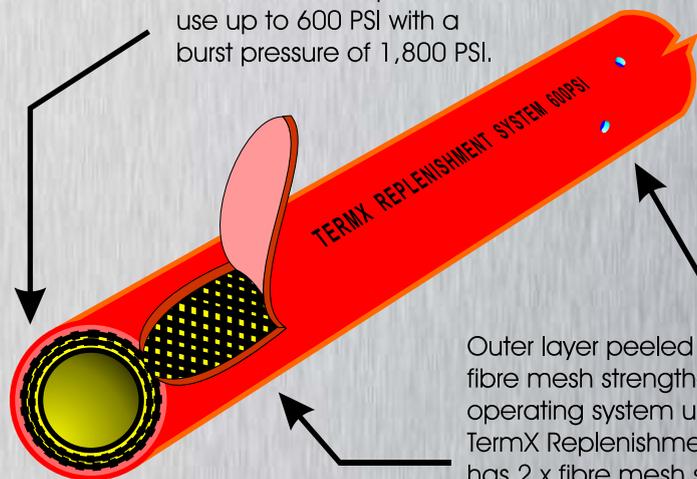

From the 1st of July 2014 all TermX replenishment system hosing will come in a safety red colour for easy identification during and after installation. This new feature will help homeowners easily identify the TermX system as a termite barrier instead of an irrigation system.

For further information go to www.termx.com.au or consult your local chemical reseller.

TermX Replenishment System is now rated to operational use up to 600 PSI with a burst pressure of 1,800 PSI.

TERMX - NEW 600 PSI

2 x holes (at 90° to each other) at 200mm intervals along length of TermX Replenishment System.

Outer layer peeled back to show fibre mesh strengthening for operating system under pressure. TermX Replenishment System has 2 x fibre mesh strengthening layers.
