

TermX Durable Notice

**TermX
Replenishment
System**

A SIMPLE SYSTEM THATSIMPLY WORKS

In Queensland at least 2 durable notices must be permanently fixed to the building in prominent locations, such as a meter box and a kitchen cupboard or the like (as per 3.1.3.2 (b)), indicating -

- the method of termite risk management; and
- the date of installation of the termite management measure; and
- where a chemical barrier is used, its life expectancy as listed on the National Regulation Authority label; and
- the installer's or manufacturer's recommendations for the scope and frequency of future inspections for termite activity.

Explanatory Information:

Durable Notices

At least two durable notices must be fixed to the building in prominent locations advising the building occupants that the termite management measures should be inspected and maintained. The notices should be clearly written, on a material that will not deteriorate or fade over time and be located in or near the meter box and in a kitchen cupboard or similar location so that it can be easily seen and read by future owners of the building. Additional information may be included if desired by the person placing the notice.

A durable notice (in accordance with BCA requirements (Clause B1.3 (i)(ii) Volume 1 and Part 3.1.3.2 (b), Volume2) is attached to the building which states that the 'TermX Replenishment System' is installed.
